 **Depth / Spectrum / Effects:** Do all frequencies, tracks and mix have enough depth? Are all instruments and sounds distributed across the spectrum? Are FX appropriately throughout the track?

DEPTH

Overall, reviewers pointed out that the bass was a bit 'muddy' and 'unclear'. Suggesting it could have more depth and character.

“Almost, maybe the kick has a long release, and that makes the bass difficult to hear. In that mix I would correct the low end. I think that the most important part of the mix (the voice) sounds great, so the people that don't know much about audio engineering will enjoy the song.”

SPECTRUM

The majority of comments suggest the track has a good distribution of sounds and the spectrum is rich with only one key comment.

“In the 1:29 section the kick is very unclear, it feels almost like rumble noise and its unheard in the common devices. The kick and the bass are fighting for the space.”

EFFECTS

XXX% of reviewers believe the effects are used appropriately throughout the track.

Reverb / Panning / Clarity: Proper use of reverb? Does the track have a balanced use of panning? Are all songs properly distributed and easy to distinguish in the mix?

REVERB

Overall, reviewers mention the amount of reverb is adequate and that it wasn't too 'wet' although the chorus could use a bit more.
